

ASSOCIATE® 240 EC

FUNGICIDE

Registration number/Registrasie Nommer L10358 Act/Wet Nr. / No. 36 of / van 1947

READ THE LABEL BEFORE USE

KEEP OUT OF REACH OF CHILDREN AND ANIMALS

FRAC GROUP	13 & 3	FUNGICIDE
An emulsifiable concentrate systemic preventive and residual fungicide for the control of powdery mildew (<i>Uncinula necator</i> = <i>Oidium tuckeri</i>) in grapes.	'n Emulgeerbare konsentraat sistemiese en residual fungicide vir die beheer van poeieragtige meeldou (<i>Uncinula necator</i> = <i>Oidium tuckeri</i>) in wingerd.	

WARNING

HAZARD STATEMENTS:

Suspected of causing cancer.

Very toxic to aquatic life with long lasting effects.

PRECAUTIONARY STATEMENTS:

Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.

Avoid release to the environment.

If exposed or concerned, get medical advice.

Collect Spillage

Store locked up.

Dispose of contents/container in accordance with applicable regulations.

ACTIVE INGREDIENTS / AKTIEWE BESTANDDELE

Proquinazid (Quinazolinone) 160 g/l Proquinazid (Quinazolinone)
 Tetraconazole (Triazole) 80 g/l Tetrakonasool (triasool)

Nett volume **1 L** **Netto volume**

WARNINGS:

HAZARD STATEMENTS:

Suspected of causing cancer.
Very toxic to aquatic life with long lasting effects.

WITHHOLDING PERIOD: minimum number of days between last application and harvest:

Wine Grapes	28 days
Table Grapes	28 days

Severe eye irritant. Can damage eyes.
Can irritate nose, throat, and skin.
Harmful if swallowed, inhaled, or absorbed through skin.
Suspected of causing cancer.
Keep out of reach of children, animals, and uninformed persons.
Store away from food and feed.
Very toxic to aquatic organisms, may cause long-term adverse effects.

RE-ENTRY: Do not enter treated area until spray deposit has dried, unless wearing protective clothing. Deadline for return of the workers on the land: 24 hours.

DISCLAIMER

Although this remedy has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal, soil climatic and storage conditions; quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the disease against the remedy concerned as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier immediately in the event of any uncertainty.

PRECAUTIONS:

PRECAUTIONARY STATEMENTS:

Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.
Avoid release to the environment.
If exposed or concerned, get medical advice.
Collect Spillage
Store locked up.
Dispose of contents/container in accordance with applicable regulations.

Causes serious eye irritation. Avoid contact with eyes.
Suspected of causing cancer.
Very toxic to aquatic organisms, may cause long-term adverse effects.
Deadline for return of the workers on the land: 24 hours.
Avoid contact with skin or clothing.
In case of eye contact with concentrate wash immediately with plenty of water and seek medical advice.

In case of skin contact, wash with plenty of soap and water.
Do not eat, smoke, or drink whilst mixing or applying the product or before washing hands and face.
Avoid contact and inhalation of the vapours (spray mist).
Precautionary measures: Give adequate ventilation to the premises where the product is stored and/or handled.
Respiratory protection: Not needed for normal use.
For worker protection during mixing and loading and application, wear protective clothing, goggles or a face shield and rubber gloves.
Always wash with soap and water after use and accidental skin contact.
Wash contaminated clothes after use.
Prevent contamination of food, feeds, drinking water and eating utensils.
Wash sprayer out with clean water after use and before other chemicals are used. Do not contaminate water sources, pasture, and crops by cleaning of equipment or disposal of wash water and wastes.
Avoid spray drift onto water sources, pastures, and crops not to be treated.
Do not apply within 14 meters of water sources.
Triple rinse the empty container in the following manner: Invert the empty container over the spray or mixing tank and allow to drain for 30 seconds after the flow has slowed down to a drip. Thereafter, rinse the empty container at least three times with a volume of water equal to a minimum of 10 % of that of the container. Add the rinsate to the contents of the spray tank.
Destroy empty container by perforation and flattening and never re-use for any other purpose.

RELEVANT SUBSTANCES:

COMPONENT	CAS No.	Concentration
Proquinazid	189278-12-4	16,92%
Tetraconazole: 1-(2-(2,4-Dichlorophenyl)-3-(1,1,2,2-tetrafluoroethoxy)-propyl)-1H-1,2,4 -triazole	112281-77-3	8,46%
Benzenesulfonic acid 4-C10-14 alkyl derivatives,calcium salt	90194-26-6	>= 1,0 - < 2,5 %
Toluene	108-88-3	>= 0,1 - < 0,25 %

FIRST AID TREATMENT:

Inhalation

Move to fresh air. Consult a physician after significant exposure. Artificial respiration and/or oxygen may be necessary.

Skin contact

Take off contaminated clothing and shoes immediately. Wash off immediately with soap and plenty of water. In the case of skin irritation or allergic reactions see a physician. Wash contaminated clothing before re-use.

Eye contact

If easy to do, remove contact lens, if worn. Hold eye open and rinse slowly and gently with water for 15-20 minutes. Get medical attention immediately.

Ingestion

Call a physician or poison control centre immediately. Do not induce vomiting without medical advice. If victim is conscious: Rinse mouth with water.

STORAGE:

Always keep the containers tightly closed.

Adequately ventilated premises.

Store in a place accessible by authorized persons only.

Keep out of the reach of children. Keep away from food, drink, and animal feeding stuffs.

HANDLING:

Avoid contact and inhalation of the vapours.

Do not eat or drink while working.

Incompatible materials: None.

Precautionary measures: Give adequate ventilation to the premises where the product is stored and/or handled.

Respiratory protection: Not needed for normal use.

Protection for hands: Use protective gloves that provides comprehensive protection, e.g., P.V.C., neoprene or rubber.

Eye protection: Use close fitting safety goggles and/or visor conforming to BS 2092 GRADE 1).

Protection for skin: Use clothing that provides comprehensive protection to the skin, e.g., cotton, rubber, PVC or viton.

RESISTANCE WARNING:

ASSOCIATE® 240 EC is a group code 13 (Proquinazid) AND 3 (Tetraconazole) fungicide. Cross resistance has also been demonstrated between **ASSOCIATE® 240 EC** and group code 13 fungicides in some fungus species [e.g. *Erysiphe (Uncinula) necator*]. Any fungus population may contain individuals naturally resistant to **ASSOCIATE® 240 EC** and other group code 13 fungicides. The resistant individuals can eventually dominate the fungus population if these fungicides are used repeatedly. These resistant fungi may not be controlled by **ASSOCIATE® 240 EC** or any other group code 13 fungicides.

To delay fungicide resistance:

- Avoid exclusive repeated use of fungicides from the same fungicide group code. Alternate or tank mix with products from different fungicide group codes. Do not alternate **ASSOCIATE® 240 EC** in spray programmes with fungicides belonging to group code 13.
- For tank mixing or alternation with products in fungicide group code M, refer to applicable individual product labels.
- Integrate the control methods (chemical, cultural, biological) into disease control programmes.

For specific information on resistance management contact the registration holder of this product.

DIRECTIONS FOR USE:

USE ONLY AS DIRECTED

ASSOCIATE® 240 EC is a fungicide containing proquinazid and tetraconazole for the control of grape powdery mildew. Although **ASSOCIATE® 240 EC** has curative properties, it is best used as a preventative treatment or in the earliest stages of disease development. To ensure good disease control, applications of **ASSOCIATE® 240 EC** must be renewed at intervals depending on disease pressure and crop development. Ensure good spray coverage during application.

ASSOCIATE® 240 EC shows excellent crop safety.

MODE OF ACTION:

Proquinazid is a new azanaphthalene fungicide with a novel mode of action extremely active on grape powdery mildew (*Erysiphe necator*). Proquinazid acts preventively on the fungus by inhibiting appressorium formation and spore germination. Proquinazid is a FRAC Group 13 fungicide.

Tetraconazole is a broad-spectrum fungicide possessing protective, curative, and eradicant properties. It belongs to the triazoles chemical group, and it is part of the SBI (Sterol Biosynthesis Inhibitors) group, acting by inhibiting the metabolic pathway leading to fungal sterol production.

It acts on the vegetative form of fungi blocking the growth of the pathogen mycelium, both outside and inside the treated plant. The product shows a very high and long lasting endotherapeutic activity. Tetraconazole is a FRAC Group 3 fungicide.

RESISTANCE MANAGEMENT:

It is recommended that **ASSOCIATE® 240 EC** be used in a programme with other fungicides against powdery mildew. **The number of ASSOCIATE® 240 EC applications must be limited to a maximum of three applications per season, of which no more than two applications of ASSOCIATE® 240 EC should be applied consecutively in grapes.**

COMPATIBILITY:

ASSOCIATE® 240 EC is compatible with a range of fungicides and insecticides used in grapes. **ASSOCIATE® 240 EC** is compatible with Curzate® Pro (Reg. No. L5698, Act No. 36 of 1947), Dithane® M-45 800 WP (Reg. No. L2914 Act No. 36 of 1947), Dithane® M-45 800 WP NT (Reg. No. L7484 Act No. 36 of 1947) and Dithane® 750 WG Neotec (Reg. No. L4213 Act No. 36 of 1947) in tank mixtures.

It is always recommended to check the physical compatibility, making a little test before the application.

No label dosage rates should be exceeded. This product should not be mixed with any product containing a label prohibition against such mixing.

MIXING INSTRUCTIONS:

Prior to application, start with clean, well-maintained application equipment. **ASSOCIATE® 240 EC** mixes easily with water and should be added directly to the spray tank during filling. Fill spray tank to 2/3 full of water. When it is present, add **ASSOCIATE® 240 EC** directly to the chemical filler having the tank under agitation otherwise directly pour the needed quantity into the spray tank under agitation. Then complete filling of the tank. Wash-out container and add washings to the spray tank. Continue agitation until spraying is complete. Use mechanical or hydraulic means. Spray immediately after preparation. Observe the most restrictive of the labelling limitations and precautions of all products use in mixtures.

SPRAY DRIFT WARNING:

Special care must be taken to avoid spray drift outside the target area, or onto ponds, waterways, or ditches.

Applying large droplets reduces drift potential but will not prevent drift if applications are made improperly or under unfavourable environmental conditions. It is the responsibility of the applicator to determine that a sprayer is suitable for the intended application, is configured properly and that drift is not occurring.

RAINFALLNESS:

The rain fastness is 2-4 hours.

SPRAY TANK CLEAN-OUT:

Take all necessary safety precautions when cleaning equipment. Do not clean near wells, water sources or desirable vegetation.

After the end of application of **ASSOCIATE® 240 EC** thoroughly rinse sprayer and flush hoses, boom, filters, and nozzles with clean water to reduce the risk of forming hardened deposits which might become difficult to remove.

Clean all other associated application equipment. Drain the tank. Dispose of waste rinse water in accordance with local regulations.

INTEGRATED PEST MANAGEMENT:

Corteva Agriscience™ support the use of Integrated Pest Management (IPM) programs to control pests/diseases/weeds. **ASSOCIATE® 240 EC** may be used as part of an IPM program, which can include biological, cultural, and genetic practices, aimed at preventing economic pest/disease/weed damage. IPM principles and practices include field monitoring or other detection methods, correct target pest/disease/weed identification, population monitoring, rotation of products with different modes-of-action and treating when target pest/disease/weed populations reach locally determined action thresholds. Consult your local cooperative extension service, professional consultants, or other qualified authorities to determine appropriate action treatment threshold levels for treating specific pest-disease-weed/crop or site systems in your area.

APPLICATION RATES:

CROP / DISEASE	DOSAGE/ 100 L WATER	REMARKS
GRAPES (WINE & TABLE): Powdery mildew (<i>Uncinula necator</i> = <i>Oidium tuckeri</i>)	25 ml	<p>Apply ASSOCIATE® 240 EC in a 14-day preventive spray program from 5-10 cm shoot length to 28 days pre-harvest (NB: for export grapes refer to NOTE 1 below).</p> <p>Recommended spray mixture volumes per ha:</p> <ol style="list-style-type: none"> 1. 5-10 cm shoot lengths up to flowering: 500-750 l. 2. From flowering to pea-size: 1000-1200 l 3. From pea-size to 28 days prior to harvesting: 1200- 1500 l. <p>Ensure thorough coverage of the bunches.</p> <p>Do not exceed a maximum of three applications of ASSOCIATE® 240 EC per season and do not apply more than two ASSOCIATE® 240 EC applications consecutively.</p> <p>Allow 28 days between last application and harvest.</p>

NOTES:

1. The withholding period i.e., number of days between last application and harvest, meets local residue limits (MRL's), but may not necessarily meet all MRL's required for export.
2. Also refer to the RESISTANCE WARNING section on this label.

ACKNOWLEDGEMENT OF REGISTERED PRODUCTS:

- ASSOCIATE® 240 EC (Reg. No. L10358, Act No. 36 of 1947), Curzate® Pro (Reg. No. L5698, Act No. 36 of 1947), Dithane® M-45 800 WP (Reg. No. L2914 Act No. 36 of 1947), Dithane® M-45 800 WP NT (Reg. No. L7484 Act No. 36 of 1947) and Dithane® 750 WG Neotec (Reg. No. L4213 Act No. 36 of 1947) are the registered products of Corteva Agriscience™.

 Information Hotline Tel No: +27(0)12 683-5700

WAARSKUWINGS:

RISIKOVERKLARINGS (S):

Mag vermoedelik kanker veroorsaak.
Baie giftig vir waterlewe met langdurige effekte.

ONTHOUDENGSPERIODE: Minimum aantal dae tussen laaste toediening en oes:

Wyndruwe 28 dae
Tafeldruwe 28 dae

'n Erge oogirritant. Kan oë beskadig.
Kan neus, keel en vel irriteer.
Skadelik indien ingesluk, ingeasem of deur vel geabsorbeer word.
Vermoedelik karsinogenies.
Hou buite bereik van kinders, diere en oningesigte persone.
Bêre apart van voedsel en voer.
Uiters giftig vir vis en waterlewende organismes.

HERBETREDING: Moet nie behandelde gebied betree alvorens die sputneerslag droog is nie, tensy beskermende oorklere gedra word.

VRYWARING

Alhoewel hierdie middel omvattend onder 'n groot verskeidenheid toestande getoets is waarborg die registrasiehouer nie dat dit onder alle toestande doeltreffend sal wees nie, aangesien die werking en effek daarvan beïnvloed kan word deur faktore soos abnormale, grond-, klimaats- en bergingstoestande; kwaliteit van verdunningswater; verenigbaarheid met ander stowwe wat nie op die etiket aangedui is nie en die voorkoms van weerstand van die siekte teen die betrokke middel sowel as die metode, tyd en akkuraatheid van toediening. Verder aanvaar die registrasiehouer nie verantwoordelikheid vir skade aan gewasse, plantegroei, en omgewing of vir nadelige effek op mens of dier of vir 'n gebrek aan prestasie van die betrokke middel as gevolg van die ontstaan van toestande wat nie kragtens die registrasie voorsien kon word nie. Raadpleeg die verskaffer in die geval van enige onsekerheid.

VOORSORGMAATREËLS:

VOORKOMENDE VERKLARING (S):

Dra beskermende handskoene/beskermende klere/oogbeskerming/gesigskerm/ gehoorbeskerming.
Vermy vrylating na die omgewing.
Indien blootgestel of bekommerd, kry mediese advies.
Versamel verspilde produk.
Berg agter slot en grendel.
Raak ontslae van die inhoud/houer in ooreenstemming met toepaslike regulasies.

Uiters giftig vir vis en waterlewende organismes, kan langtermyn nadelige gevolge hê. Spertyd vir die terugkeer van die werkers na die land: 24 uur

Vermy oogkontak. Ingeval konsentraat in oë kom, was onmiddellik met volop water en kry mediese advies.

Vermoedelik karsinogenies, vermy dus kontak met vel en klere. In die geval van aanraking met vel, was met oormaat seep en water.

Moet nie eet, rook of drink terwyl die produk gemeng of toegedien word nie of voordat die gesig en hande nie gewas is nie.

Moet nie die sputnewel inasem nie. Voorkomende maatreëls: Verskaf voldoende ventilasie in die perseel waar die produk gestoor en / of hanteer word.

Respiratoriële beskerming is nie nodig vir normale gebruik nie.

Vir die beskerming van werkers tydens ver menging, hantering en toediening, dra beskermende klerasie, 'n beskermende bril of gesigskerm en rubberhandskoene.

Was altyd met seep en water na gebruik en na toevallige velkontak.

Was besmette klere na gebruik.

Verhoed besoedeling van voedsel, voer, eetgerei en drinkwater.

Was toedieningsapparaat uit met skoon water na gebruik en voordat dit vir ander middels gebruik word. Verhoed besoedeling van waterbronne, weiding en ander gewasse tydens skoonmaak van apparaat of met waswater.

Voorkom sputnewelwegdrywing na waterbronne, weiding en gewasse wat nie behandel word nie.

Moet nie toedien binne 14 meter van waterbronne nie.

Spoel die leë houer drie keer as volg uit: Keer die leë houer om oor sput- of mengtenk en dreineer vir 30 sekondes na die vloeistof tot 'n gedrup verminder het. Spoel daarna die leë houer minstens drie keer uit met 'n volume water gelykstaande aan 'n minimum van 10 % van die inhoud van die houer en voeg by die inhoud van die sputtenk.

Vernietig die leë houer deur gate in te kap en plat te druk en moet dit vir geen ander doel gebruik nie.

RELEVANTE STOWWE:

KOMPONENT	CAS No.	Konsentraat
Proquinazid	189278-12-4	16,92%
Tetrakonasool: 1-(2-(2,4-Dichlorofeniel)-3-(1,1,2,2-tetrafluoretoksie)-propiel)-1H-1,2,4-triasool	112281-77-3	8,46%
Benseensulfonsuur 4-C10-14 alkielderivate, kalsiumsout	90194-26-6	>= 1,0 - < 2,5 %
Tolueen	108-88-3	>= 0,1 - < 0,25 %

EERSTEHELP BEHANDELING

Inaseming

Beweeg persoon na vars lug. Raadpleeg 'n geneesheer na aansienlike blootstelling. Kunsmatige asemhaling en/of suurstof mag nodig wees

Velkontak

Trek onmiddellik besmette klere en skoene uit. Was dadelik af met seep en baie water. In die geval van velirritasie of allergiese reaksies, raadpleeg 'n dokter. Was gekontamineerde klere voor hergebruik.

Oogkontak

As dit maklik is om te doen, verwijder kontaklens, indien gedra. Hou oog oop en spoel stadig en saggies uit met water vir 15-20 minute. Kry onmiddellik mediese hulp.

Inname

Bel onmiddellik 'n geneesheer of gifbeheersentrum. Moenie braking veroorsaak sonder mediese advies nie. Indien slagoffer by sy bewussyn is: Spoel mond uit met water.

STOOR:

Hou altyd die houers dig toe.

Stoor in 'n goed geventileerde perseel.

Berg in 'n plek wat slegs vir gemagtigde persone toeganklik is.
Hou buite die bereik van kinders. Stoer weg van voedsel, drank en dierevoeding.

HANTERING:

Vermy kontak en inaseming van dampe.
Moet nie eet of drink terwyl jy werk nie.
Onverenigbare materiale: Geen in die besonder.
Voorkomende maatreëls: Verskaf voldoende ventilasie in die perseel waar die produk gestoor en / of hanteer word.
Respiratoriese Beskerming: Nie nodig vir normale gebruik.
Handbeskerming: Gebruik beskermende handskoene wat omvattende beskerming bied, bv P.V.C., neoprene of rubber.
Oogbeskerming: Gebruik veiligheidsbril en oogskerm wat voldoen aan BS 2092 (GRAAD 1).
Velbeskerming: Gebruik klere wat omvattende beskerming bied aan die vel, bv katoen, rubber, PVC of Viton.

WEERSTANDSWAARSKUWING:

ASSOCIATE® 240 EC is 'n groepkode 13 (Proquinazid) **EN 3** (tетраконазол) swamdoder. Kruisweerstand tussen **ASSOCIATE® 240 EC** en groepkode 13 swamdoders in sommige swampesies [bv. *Erysiphe (Uncinula) necator*] is bewys. Enige populasie van 'n spesifieke swam mag individue insluit wat 'n natuurlike weerstand teen **ASSOCIATE™ 240 EC**, of enige ander groepkode 13 swamdoder het. Indien hierdie swamdoders herhaaldelik aangewend word, kan die weerstandbiedende individue uiteindelik die swampopulasie oorheers. Hierdie weerstandbiedende swamme sal waarskynlik nie deur **ASSOCIATE® 240 EC** of enige ander groepkode 13 swamdoders beheer word nie.

Om weerstand teen swamdoders te vertraag:

- Vermy die eksklusieve herhaaldelike gebruik van swamdoders met dieselfde groepkode. Wissel af met, of gebruik tenkmengsels van produkte in verskillende swamdoder groepkodes. Moet nie **ASSOCIATE® 240 EC** in spuitprogramme met groepkode 13 swamdoders, awissel nie.
- Raadpleeg toepaslike individuele produkhetkette wanneer daar afgewissel word, of tenkmengsels gemaak word, met produkte in swamdodergroepkode M.
- Integreer ander beheermaatreëls (chemies, verbouing, biologies) in swamdoder programme.

Vir spesifieke inligting oor weerstandsbestuur kontak die registrasiehouer van hierdie produk.

GEBRUIKSAANWYSINGS:

GEBRUIK SLEGS SOOS AANGEDUI

ASSOCIATE® 240 EC is 'n swamdoder met Proquinazid en Tетраконазол vir die beheer van witroes op druiwe. Hoewel **ASSOCIATE® 240 EC** genesende eienskappe het, word dit hoofsaaklik gebruik as 'n voorkomende behandeling in die vroeë stadiums van siekte ontwikkeling. Ten einde goeie siekte beheer te verseker, moet behandelings met **ASSOCIATE® 240 EC** met tussenposes afhangende van siektedruk en gewasontwikkeling hernu word. Verseker goeie bedekking tydens behandeling.

ASSOCIATE® 240 EC is baie veilig vir aanbevole gewasse teen aanbevole dosisse.

WYSE VAN WERKING:

Proquinazid is 'n nuwe azanaphtalene swamdoder met 'n unieke wyse van werking op druwe witroes (*Erysiphe necator*). Proquinazid tree voorkomend op teen die swam deur appressorium vorming en spoor ontkieming te inhibeer. Proquinazid is 'n FRAC Groep 13 swamdoder.

Tetraconazole is 'n breë spektrum swamdoder met beskermende, kuratiewe en uitwissende eienskappe. Dit behoort aan die triasool chemiese groep en is deel van die SBI (Sterool Biosintese Inhibeerders) groep wat optree deur die metaboliese baan wat lei tot swam sterool produksie te inhibeer.

Dit tree op teen die vegetatiewe vorm van swamme en blok die groei van die patogeen miselium, beide binne en buite die behandelde plant. Die produk toon 'n baie hoë en langdurige interne terapeutiese aktiwiteit. Tetraconazole is 'n FRAC Groep 3 swamdoder.

WEERSTANDSBESTUUR:

Dit word aanbeveel dat **ASSOCIATE® 240 EC** in 'n program met ander swamdoders teen witroes gebruik word. Die aantal **ASSOCIATE® 240 EC** behandelings moet beperk word tot 'n maksimum van drie toedienings per seisoen, waarvan nie meer as twee toedienings van **ASSOCIATE® 240 EC** opeenvolgend op druwe toegedien moet word nie.

VERENIGBAARHEID:

ASSOCIATE® 240 EC is verenigbaar met 'n verskeidenheid swamdoders en insekdoders wat op druwe gebruik word. **ASSOCIATE® 240 EC** is verenigbaar met Curzate® Pro (Reg. Nr. L5698 Wet Nr. 36 van 1947), Dithane® M-45 800 WP (Reg. Nr. L2914 Wet Nr. 36 van 1947), Dithane® M-45 800 WP NT (Reg. Nr. L7484 Wet Nr. 36 van 1947) en Dithane® 750 WG Neotec (Reg. Nr. L4213 Wet Nr. 36 van 1947) in tenkmengsels.

Dit word altyd aanbeveel om 'n fisiese verenigbaarheidstoets te doen. Maak 'n bietjie aan voor die behandeling.

Moet nooit die etiket dosisse oorskry nie. Hierdie produk moet nie vermeng word met enige produk wat 'n etiket verbod teen sodanige vermenging het nie.

MENGINSTRUKSIES:

Voor behandeling, begin met skoon, goed onderhoude sputtoerusting.

ASSOCIATE® 240 EC meng maklik met water en moet direk by die sputtenk gevoeg word tydens volmaak.

Maak die sputtenk 2/3 vol water.

Voeg **ASSOCIATE® 240 EC** direk in die sputtenk met water terwyl geroer word.

Vul die tenk.

Was die houer en voeg die waswater by die sputtenk.

Hou aan roer totdat bespuiting voltooi is.

Gebruik meganiese of hidroliese manier van roer.

Sput onmiddellik na die voorbereiding van die mengsel.

Neem die mees beperkende van die etiketbeperkings en voorsorgmaatreëls in ag van alle produkte gebruik in die mengsel.

SPUITNEWEL VERSPREIDING:

Spesiale sorg moet geneem word om die wegdrywing van spuitnewel buite die doelgebied te vermy veral na damme, waterweë of slotte.

Die toediening van groot druppels verminder die risiko van wegdrywing maar sal dit nie verhoed as behandelings onder ongunstige omgewingstoestande gemaak word nie. Dit is die verantwoordelikheid van die spuitoperator om te bepaal of die toestande gunstig is vir 'n behandeling en dat spuitnewel wegdrywing nie sal plaasvind nie.

REËNVASTHEID:

Die reënvastheid is 2-4 ure.

SKOONMAAK VAN SPUITTENK:

Neem al die nodige veiligheidsmaatreëls tydens die skoonmaak van toerusting. Moenie skoonmaak naby putte, waterbronre of wenslike plantegroei nie.

Na die behandeling met **ASSOCIATE® 240 EC** spoel spuittoerusting deeglik uit met skoon water om die risiko van die vorming van geharde depositos wat moeilik is om te verwijder te verminder.

Maak alle verwante behandelingstoerusting goed skoon. Dreineer die tenk. Raak ontslae van afval spoelwater in ooreenstemming met plaaslike regulasies.

GEïNTEGREERDE PLAAGBEHEER:

Corteva Agriscience™ ondersteun die gebruik van Geïntegreerde Plaagbeheer (IPM) programme om siektes te beheer.

ASSOCIATE® 240 EC kan gebruik word as deel van 'n IPM program wat biologiese, kulturele en genetiese praktyke kan insluit wat gemik is op die voorkoming van ekonomiese siekte skade.

IPM beginsels en praktyke sluit in die veld monitering of ander opsporing metodes, korrekte teiken siekte identifikasie, monitering van bevolkings, rotasie van produkte met verskillende wyses van werking en die behandeling van die teiken siekte populasies wanneer plaaslik bepaalde optrede drempels bereik word.

Raadpleeg professionele konsultante of ander gekwalifiseerde owerhede om die nodige behandelingstappe of drumpelwaardes te bepaal vir die behandeling van 'n spesifieke siekte in jou area.

TOEDIENINGSHOEVEELHEDE:

GEWAS/SIEKTE	DOSIS/ 100 L WATER	OPMERKINGS
